ABHAY SINGH THAKUR

West Lafayette, IN 47906

(765) 404-7109 thakur12@purdue.edu linkedin.com/in/abhay-singh-thakur/ github.com/thakur22429s

EDUCATION

Purdue University **Aug 2019 – May 2023**

Bachelor of Science in Computer Science and Data Science *West Lafayette, IN*

Dean's List and Semester Honors (Fall 2019, Spring 2020, Fall 2020)

Concentration: Cybersecurity and Machine Intelligence

Relevant Coursework: Systems Programming, OOPS, DSA, Machine Learning, Data Mining, Database Design, Cryptography, Agile Methodology

Emirates Future International Academy **Apr 2013 – Apr 2019**

High School Diploma *Abu Dhabi, UAE*

TECHNICAL SKILLS

Languages: Python, C/C++, Java, Go, Rust, Ruby, R, SQL, Assembly (x86, ARM), Shell Scripting (Bash), JavaScript
Dev Tools & Libraries: GitHub, Jira, Vim, VS Code, RStudio, MySQL, SAS, Terraform, Ansible, scikit, Tensorflow
Frameworks: Tailwind CSS, React, Next.js, AWS, Django, GraphQL, MongoDB, Tableau, Docker, Kubernetes, web3

EXPERIENCE

Technical Intern | *Pacific Northwest National Lab (US Dept. of Energy)* - Richland, WA **Jun 2022 – Oct 2022**

- Automating resource-provisioning pipeline by writing Terraform and Ansible scripts to deploy network and compute devices in a large-scale environment up to 3x faster than existing manual procedure saving 130+ person hours annually
- Deploying and documenting testbeds on highly secured on-premise intranet to simulate cyber threat scenarios which help in efficiently utilizing allocated resources
- Minimizing network infrastructure storage costs by using infrastructure-as-code tools which also help in dealing with finer functional requirements

Undergraduate Teaching Assistant | *Purdue University* – West Lafayette, IN **Aug 2021 – Present**

- Developed course curriculum, graded assignments for 200+ students for CS 251(Data Structures and Algorithms)
- Conducted 3+ weekly office hours to resolve student queries and help students with assignments using Piazza

Member | *b01lers (Purdue Capture The Flag)* **Jan 2021 – Present**

- Applying skills in web security, cryptography, and forensics to compete in computer security competitions where participants solve security-themed challenges

ACADEMIC PROJECTS

Purdue Circle | *GraphQL, next.js, TailwindCSS* **Jan 2022 – May 2022**

- Created a social media and networking app for Purdue students as part of an Agile team
- Constructed a pipeline to feed user queries processed by next.js into a headless GraphQL CMS to minimize response payload size by 60% and served them using TailwindCSS on multiple platforms
- Modeled a popularity engine with 73% accuracy and employed features such as user posts, timelines, direct messaging, and reactions to ensure content is socially curated and promoted exclusively by users

Movie Magpie | *React, Material UI, Firebase* **Jul 2021 – Aug 2021**

- Built a movie recommendation system with accuracy 78% based on user-defined parameters such as movie genre, release dates, ratings and popularity, utilizing API calls made over a database consisting 10k+ movies
- Added CRUD functionality using Google Firebase to provide users with features such as saving recommendations, creating user profiles and provide feedback on accuracy of predictions

MyShell | *C++, Flex, Bison, Bash* **Mar 2021 – Apr 2021**

- Implemented functionality from bash and csh to build a shell interpreter using C++ which supports 10+ features such as autocomplete, command history, environment variables, support for subshells, etc
- Integrated Flex as scanner generator and Bison as parser generator for implementing shell grammar

NASA International Space Apps Challenge 2020 | *Tensorflow, Tableau, Excel* **Sept 2020 – Oct 2020**

- Tackled the 'Spot that Fire v3' challenge by creating a fire recognition system trained on 1M+ live dataset by NASA
- Devised a prototype app to notify dangerous fires nearby with an accuracy of 82% and visualized a dashboard on Tableau to spread awareness of wildfires

Find My Bike | *Android Studio, Google Maps Platform* **Sept 2019**

- Developed an Android app to help locate lost bikes on college campuses using Google's Geolocation API and Maps SDK
- Designed a UI that provided users with an interactive map which helped them navigate back to lost bikes
- Incorporated support for over 50k+ queries per day with an error rate of less than 12%
